Egypt Vision 2030
Challenges Facing Digital Empowerment for Learning
Thursday 11 April - Saturday 13 April 2019
Mövenpick Resort Soma Bay, Red Sea, Egypt

edu'19
cairo
conference

Why this Conference?

Egypt has placed education at the top of its priorities as the main pillar for building the state towards a new stage of leadership. Quality in education has become a national demand that all strata of the people have agreed upon without compromise. Therefore, the convening of the educairo'19 conference at this time coincides with the announcement of Egypt's head of state that 2019 is the year of education, in tandem with Egypt's 2030 vision for digital empowerment in education (empowerment of students, teachers and schools). The conference plays a pivotal role in this through attracting internationally recognized expertise on the best use of digital technology to improve the quality of education. educairo'19 aims to find effective mechanisms to achieve effective results on the quality of Egyptian education and to prepare a creative and innovative student who can deal with advanced digital technology commensurate with his/her skills and needs of the labor market.

Conference Objectives

- Knowing the international experiences in digital empowerment in education
- Monitoring the current technology in education situation in Egypt
- Setting strategies to address the challenges of digital empowerment in education.
- Developing indicators of the quality of the technological environment for education (in light of Egypt's 2030 Vision).
- Improving the education of marginalized communities using technology.
- Integrating digital citizenship into the education system in Egypt.

Conference Topics

- Global experiences in addressing challenges facing digital empowerment in education.
- The current situation of technology utilization in education in Egypt.
- Strategies to face digital empowerment in education.
- Marginalized communities and the use of technology in education (disability and poorer societies).
- Global citizenship and technological requirements to achieve digital citizenship in education in Egypt.

2019

Year Of Education
